

Launch of Future of Sex Report: 9 Detailed Predictions on the Impact of Technology on Human Sexuality

Future of Sex Report, a detailed 25-page research report on humanity's erotic future, has been launched by FutureofSex.net, the world's leading publication on the intersection of technology and sexuality. The report was co-authored by FutureofSex.net Editor Jenna Owsianik and the site's publisher Ross Dawson, a globally recognized futurist and author well-known for his Newspaper Extinction Timeline and other pointed predictions.

The report focuses on 5 major fields, explaining for each what they are, the state of the art today and what to expect tomorrow in:

- Remote Sex
- Virtual Sex
- Robots
- Immersive Entertainment
- Augmentation

The report contains 9 predictions on how our sex lives will undergo dramatic change and reach new heights in the next few decades.

"Technology is transforming every aspect of our lives, including our sexuality," says Ross Dawson, leading futurist and the publisher of FutureofSex.net. "How we connect with our loved ones, the intimacy of our relationships with technology, and even our identities are swiftly moving into uncharted territory."

"Sexual relationships are no longer limited by geographic space, and breakthroughs in the medical field are opening and re-opening erotic possibilities in the face of human biology," says Jenna Owsianik, editor of FutureofSex.net "Research into making sex safer—and more pleasurable—has also gained significant financial support, paving the way for an exciting sexual future."

The 9 predictions are:

- Adult performers and some B-list celebrities will sell robotic replicas of themselves designed for sex by 2033
- One in 10 young adults will have had sex with a humanoid robot by 2045
- By 2028 over a quarter of young people will have had a long-distance sexual experience
- 3D-printed body parts of your lover, enabled with touch feedback, will add intense realism to long-distance sex by 2025
- First dates in motion-capture virtual worlds will become popular by 2022
- By 2024 people will be able to be anybody, with anybody, enacting impossible fantasies in photo-realistic virtual worlds
- Brain-to-brain interfaces will allow partners to stimulate each other to reach orgasm directly by 2027
- Sci-Fi sex fantasies will spring to life as people can enhance their biology and merge with machines to become superhuman sex idols
- By 2020 people will regularly pair virtual reality and haptic sex toys to fully immerse themselves into adult entertainment

About FutureofSex.net

Launched in 2011, the publication has grown to become the world's leading publication on how technology is changing human sexuality, today and tomorrow. It provides deep, insightful coverage of the edge of sex technologies and possibilities, including sex robots, remote sex, immersive adult entertainment, human augmentation, and virtual sex.

Its mission is to help people understand the possibilities and implications of how sex is evolving, so they are better prepared for the coming transformation of human sexuality, potentially far beyond what we have ever before imagined.
